

How to Set up a Farm Company (CCA Specific)

All CCA users need to make sure they have a region for each clients' property and need to specify the Irrigation information for each paddock (dropdown menu of Dryland/Irrigation).

Step 1, region:

Select a client from your client list and click on the View client map option.

Then hover over Maps and select Quick Farm Setup.

Name:	Cropping method:	Area (2017):	Crop (2017):	Variety (2017):	Location:
Cowan	Select..	42.72	Wheat	Corack	<input checked="" type="checkbox"/>
Cruise	Select..	83.9	Barley	Baudin	<input checked="" type="checkbox"/>

Enter in the Reporting region for each of the client's properties.

Step 2, irrigation method:

Set the irrigation method for each individual paddock as either Dry Land or irrigation. You also have the option to set the crop and variety in this page, or you can set the crop and variety in the Planning screen if you will be using Agworld to create crop plans for this client.

Paddocks						
Name:	Cropping method:	Area (2017):	Crop (2017):	Variety (2017):	Location:	
Cowan	Dry land	42.72	Wheat	Corack	✓	Delete
Cruise	Dry land	83.9	Barley	Baudin	✓	Delete
Floyd	Dry land	33.27	Canola	Tawriffic TT	✓	Delete
Fosters	Dry land	66.92	Wheat	Corack	✓	Delete
Grano	Dry land	17.95	Wheat	Corack	✓	Delete
Green Hill	✓ Select.. Dry land Irrigated	41.48	Canola	Tawriffic TT	✓	Delete
Harrison		31.04	Wheat	Corack	✓	Delete
Jamestown	Select..	33.36	Canola	Tawriffic TT	✓	Delete
Johnnos	Select..	41.33	Barley	Baudin	✓	Delete
Old House	Select..	54	Wheat	Corack	✓	Delete
Pabbas	Select..	12.55	Barley	Baudin	✓	Delete

That's it! Your client is ready for reporting by CCA
